

Name \_\_\_\_\_

# Animals

Animals are living beings and, therefore, are born, grow, reproduce and die. Land animals live on earth. Aquatic animals live in water.

Animals can be classified according to their diet into three groups: herbivores, carnivores and omnivores. Herbivores eat plants. Carnivorous animals eat other animals. Omnivorous animals eat both plants and other animals.

Animals can also be classified according to their reproduction. Viviparous animals are born from the womb of the mother. Oviparous animals hatch from eggs.

carnivore

herbivore

omnivore

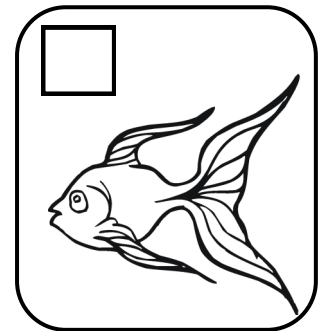

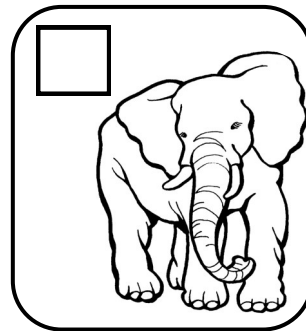

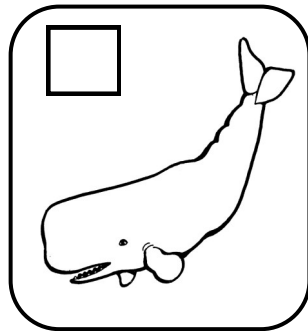

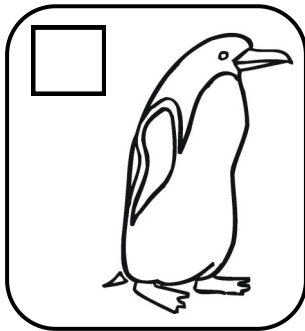

oviparous

viviparous

**1. Color land animals green and aquatic animals blue. Investigate and then write in the box V for viviparous animals and O for oviparous animals.**

**2. Complete the table.**
