

Name _____

Date _____

Dentist

The dentist is the doctor who is responsible for making sure our mouth, teeth, and gums are healthy.

The dentist checks that the teeth are forming correctly in the mouths of children as they grow, and he repairs the teeth with cavities.

The dentist also teaches people how to clean and take good care of their teeth by brushing them at least twice a day with a toothbrush, toothpaste, and using dental floss.

They work in clinics or dental offices. They wear gloves, masks, and glasses to protect against germs when working on children's teeth.
