

Name _____

Date _____

Doctor

The main job of a doctor is to cure the sick. The doctor checks our bodies to see if we are healthy. He asks us if something hurts. When we are sick, he prescribes medicines and treatments.

Tools that doctors use include a stethoscope to listen to the heartbeat of patients, an otoscope to check the ears, a scale to check the weight, and a thermometer to check for fever.

Doctors work in hospitals, clinics, and doctors' offices. We must not be afraid to go to the doctor. The doctor checks that everything is going well with our health and growth.
