

Name _____

Date _____

Firefighter

Firefighters put out fires, help in accidents, perform rescues, and give first aid in cases of emergency. Their work is very risky, so they wear protection against fire: helmets, gloves, boots, goggles, and tanks of oxygen.

To extinguish fires, they use hoses, water, fire extinguishers, and ladders. They drive to the fire on a fire engine, a red truck that carries a motor to pump water and other tools to put out fires.

The sound of the fire truck siren announces that the brave firefighters are going to an emergency.
