

Moon Phases

My Name: _____

The moon goes through many phases in its 28 day cycle.

1

When we can't see the moon,
it is call a New Moon.

2

When the light is getting
bigger we call it waxing.
This phase is Waxing Crescent.

3

This phase is called First Quarter.
It looks like one half, but is one
quarter of the whole moon.

4

When the part of the moon we
see is completely full of light,
we call it the Full Moon

6

This phase is called
Waxing Gibbous

5

As the light of the moon gets
smaller we call it waning. This
moon phase is Waning Gibbous

7

The moon phase that looks like this is called Last Quarter.

8

New Moon

Waxing Crescent

First Quarter

Waxing Gibbous

Full Moon

Waning Gibbous

Last Quarter

Waning Crescent

New Moon

The moon phase before it is completely dark is called Waning Crescent.
