

Name _____

Date _____

Photographer

The photographer is the person who takes photos of different events: birthdays, weddings, anniversaries, and other major events.

He can take pictures of people, places, or things. Some photographers take photos to sell products, such as sneakers or clothing for advertisements. Others take pictures of news events to put in the newspapers. Some take pictures of landscapes, places of interest, and cities so that people will visit them.

Photographers use a camera, lenses, lighting equipment, and a lab. They also use computers to edit digital photographs.

Photographers can work in many places: photography studios, newspapers, and magazines, in event companies, or they can work independently.
