

Name \_\_\_\_\_

Date \_\_\_\_\_

# Welder

The welder is responsible for welding metal parts by using special torches to melt welding rods between the metal parts to join them.

The work of a welder has many hazards, such as burns or explosions. The welder must follow all safety measures to prevent accidents.

A welder wears protective clothing, such as goggles and face shields to protect their eyes and face. They also wear gloves, leather apron, and special shoes. The welder must also use respirators to avoid inhaling fumes and toxic gases.
