

## Making Math Fun

Charlotte is in the fourth grade. She used to think math was a very boring subject until this year. Her teacher, Miss Morgan, created a Mathematics Learning Center in their classroom. It is filled with blocks, games, puzzles, flash cards, and many other things that the students can use together or individually to develop their math skills. There are even several computers in the center with math games and activities. Most of the students like this center the best and want to spend time in it each day.

Miss Morgan told the class that April is Mathematics Awareness Month, and she plans to put a bunch of new activities in the center. The students will even get to create some of their own math puzzles and games next week. Charlotte cannot wait to see the new stuff in the mathematics center. She also cannot imagine why she ever thought math was boring.

\*\*\*\*\*

- Charlotte used to think \_\_\_\_\_ was a very boring subject.  
 reading  science  
 math  history
- Charlotte's 4th grade teacher is \_\_\_\_\_.  
 Miss Morgan  Mr. Smith  
 Ms. Johnson  Dr. Baker
- What did Miss Morgan put in the classroom to make learning math fun?  
 more crayons  a Mathematics Learning Center  
 new desks  a Reading Center
- April is \_\_\_\_\_ Awareness Month.  
 Mathematics  Reading  
 Good Health  Sports
