

Solution

CASE A

Marta should wash her hands as soon as she gets in the house even if she wears gloves.

Otherwise, the virus can spread throughout the house because of not taking the proper hygienic measures.

Solution

CASE B

Luis should cough into his elbow if he doesn't have time to cough into a tissue.

If he does cough in his hand, he needs to wash his hands or use an antibacterial gel before he touches anyone or anything.

Solution

CASE C

Juan must wash the apple or remove the skin before he bites into it.
