

## Solution

### CASE D

The mother should not give her child antibiotics without consulting a doctor first. Not all symptoms of an illness are resolved with an antibiotic.

## Solution

### CASE E

When you are sick, you should not leave the house unless it is to visit the doctor. If a sick person gets together with other individuals, they can infect them with their illness. The most responsible thing is to stay home and recover.

**Wear a mask  
to prevent  
infecting others.**
