

SEQUENCING EXERCISES-ADVANCED LEVEL

Place the sentences in a logical and coherent order. Cut and paste or write in the boxes below.

Milk

Milk comes from different mammals, such as cows, sheep and goats.

Once cooled, it is filtered and the pasteurization, sterilization and homogenization are started.

To extract it, the cows are milked and the milk is refrigerated and stored hygienically in refrigerators.

The most consumed milk is that of cow. For this reason, there are dairy farms where cows are raised and fed to obtain a quality milk.

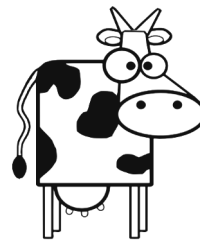

Finally it is packaged and prepared to be distributed in the different stores.

NAME _____

DATE _____

Milk
