

Pinwheel Pattern

1. Use pattern square or place it over construction or cardstock type of paper. You can also make your own square. Fold the lower left corner of a paper diagonally towards the right side. Cut the paper that is exposed along the top. It should leave you with a perfect square.

2. Cut the square (cut only along the solid line)

3. Fold paper along the dotted lines to make a triangle

4. Fold paper one more time along the dotted lines to make a smaller triangle.

5. Unfold the paper and decorate both sides using paints stickers or colors.

6. Cut along the dashed lines (do not go to the center)

7. Carefully fold each of the four points (with the dot) to the center. (Be careful not to crease the paper).

8. Insert a pin into the center making sure you go through all the dots

9. Push the pin into an eraser at the end of a pencil. Regular pins work better than push pins. Make sure to cut the end of the pin with a pair of pliers.

For better spinning,
do not to push the pin
tightly.
